

Simplify content compliance and get materials to market faster

Life science organizations have to balance launching truthful, non-misleading content while achieving an efficient material review process to meet commercial goals and compliance requirements. For many companies, this process is difficult, inefficient, and frustrating.

With Vodori, you can trust that your team is compliant with your SOPs and local health authority guidelines while collaborating effectively to get quality content to market.

The Vodori Platform

Workflow management

Manage work, enforce compliance, and collaborate in real-time

Web annotation

Review, annotate, and collaborate on digital content in its native format

Claims and evidence management

Substantiate materials and independently approved and tracked claims and references

What makes Vodori different?

Great software

Put simply, Vodori is easy to use. Our data shows that the easier it is to use your material review software, the faster you're able to get content to market. Our users love us because we uncomplicate their work and foster a culture of compliance.

GxP Validation & Data Privacy

Vodori is a validated platform and compliant with 21 CFR Part 11 and EU Annex 11. We're purpose-built for life science companies with the specific features, software quality, and audit-readiness you require.

Vodori 360 Customer Program

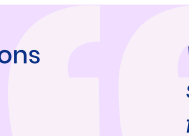

In addition to a best-in-class content compliance platform, Vodori 360 provides peerless customer service and support to all system owners and users. Tailored configuration including continuous process optimization, regular business reviews, and 24/7 support are all included at no additional cost.

Marketing Manager
@ LENZ Therapeutics

We're very happy with Vodori, it's an absolute breeze to use. Our review team is able to log in, comment, and vote within a day of uploading content to the system. It's the MLR system that everyone should be using.

Head of Medical Operations & Effectiveness
Convatec

When your MLR system is easy to use, it's fun to use. Users actually use the software, which helps us stay compliant and deliver content to market faster.
